Summary

Current student looking to join the workforce to gain real-world experience. Ability to complete tasks on time in both individual and team settings. Dependable and reliable, ready to learn and grow with your company. Reliable worker with time management, and computer skills. Driven and detail-oriented individual with a desire to use analytical and problem-solving skills to meet goals. Seeking to utilize good communication, interpersonal, and organizational skills to complete tasks. Reliable with a good work ethic and the ability to quickly adapt to new tasks and environments.

Education

03/2027 Chennai	B.Tech: Electronics And Communications Engineer (ECE) Vellore Institute Of Technology
04/2023 Chennai	High School Diploma Velammal Vidyalaya Annexure

Experience

05/2026 – Current Chennai, India	Netraga Software Engineer Intern • Developed full-stack web applications using the MERN stack as part of internship training. • Implemented RESTful APIs, JWT-based authentication, and MongoDB integration in MERN applications. • Containerized applications using Docker for consistent development and deployment environments. • Deployed MERN applications to Vercel and Render with MongoDB Atlas, configuring environment variables and application services.
06/2025 – 07/2025 Chennai, India	NStore Retech Private Limited Performance Testing Intern • Assisted in regression and load testing using K6 to analyze application performance, scalability, and system reliability, contributing to enhanced testing processes. • Developed and automated UI test scripts using Selenium for Haramamall platform, containerizing them with Docker to ensure reliable cross-environment execution. • Conducted software testing to identify and report bugs.

Projects

05/2026 – 05/2026	Gatherly 🌐 React.js Node.js Express.js MongoDB • Developed a full-stack event management platform using the MERN stack. • Implemented secure JWT authentication with role-based access control for users and administrators. • Designed RESTful APIs for event creation, event management, user registration, and ticket booking.
-------------------	---

- Integrated MongoDB Atlas for persistent data storage and implemented email-based OTP verification for bookings.
- Containerized and deployed the application using Docker, Render, and Vercel.

06/2026 – 06/2026

Food - Reels Platform

React.js | Node.js | Express.js | MongoDB | ImageKit

- Developed a full-stack MERN application enabling users to discover restaurants through short-form food videos.
- Implemented secure JWT authentication, role-based access control, likes, saved reels, and food partner dashboards.
- Integrated ImageKit for optimized image and video storage.
- Designed RESTful APIs for reels, likes, saved posts, authentication, and food partner management.
- Containerized the application using Docker and deployed it using Vercel, Render, and MongoDB Atlas.

Skills

- | | | |
|--------------------------------|----------------------|----------------------|
| • Python programming | • MongoDB | • Problem Solving |
| • JavaScript | • SQL | • Team Collaboration |
| • Docker | • Postman | • Active Listening |
| • RESTful APIs | • JWT Authentication | • Adaptability |
| • Data Structures & Algorithms | • GitHub | |

Achievements

- Solved 74+ Data Structures & Algorithms problems on LeetCode.
- Developed and deployed two full-stack MERN applications.
- Completed internships in Software Development and Performance Testing.
